

Creation Teaches Us About God

The heavens declare the glory of God,
and the sky above proclaims his handiwork.

- Psalm 19:1

Creation Teaches Us About God

The heavens declare the glory of God, and the sky above proclaims his handiwork.

- Psalm 19:1

Do you like to draw? Imagine your Mom put one of your pictures on the refrigerator. The next day the refrigerator broke and a repair man came to fix it. What could he learn about you by looking at your picture? He might learn you like horses, because your picture is of a horse. He would know your favorite color is blue because you used it so often. What we do and how we do it says a lot about who we are and what we are like.

It's the same with God. One way we learn about God is by looking at what he has made. Think about the sun, moon and stars; what do they teach us about God?

- ☆ The sun is big and powerful. God is even more powerful than the sun.
- ☆ There are billions of stars. God is smart. He knows each one by name and put them just where he wanted.
- ☆ The moon is beautiful at night. God is beautiful. He creates beautiful things like the moon.

The heavens declare the glory of God. They tell us how special and valuable God is. God wants us to see his glory and understand that creation is telling us, "God is great! There is no one else like him!" The glory of God is something we see with our eyes as we look at the world around us.

Why did God make so many colors, shapes and sizes to see? Why did God make so many sounds, smells, tastes and textures? He did these things to show us his glory; to show how great he is! God wants us to see and understand that he alone is God. He is a great God and there is none like him.

What else has God made? What does this teach you about God and the glory of God?
